

*See Notes If You
Have Ladder Rack or Jerry
Can on Rear of Canopy.

Standard length main bar is
500 from the center of the
bike channel to the center
hitch pin hole.
X is the +Main Bar you need
to maintain 500 from canopy.

Hitch Pin Hole

If your bike is 850 across the bars $\div 2 = 425$
 $X + \text{standard } 500 = 75\text{mm clearance from inside bar to canopy}$
